

Software Project Manager / Product Consultant

Background:

FTS Financial Transparency Solutions GmbH (FTS) is a new, emerging SupTech (Supervisory Technology) industry software provider designing and building Anti-Money Laundering software tools for Supervisory Authorities. FTS has a vision of designing and building state-of-the-art software in the area of financial crime prevention. A baseline product, Strix AML, is already commercially available but must be customized for each client's specific needs and operating environment. FTS has a current need and is expecting further growth. <https://www.strix-aml.com/>

Job Description:

The Employee will be a software project life cycle manager. This will include giving demos, draft proposals, managing day-to-day project activities including client communication, preparing the client's host working environment, provide steering feedback to FTS software developers to adapt tool to client's needs and operating environment, definition of client interfaces, performing post-installation verification procedures on-site (interfaces, functionality, and accuracy), and internal project reporting and planning. Additionally, as possible, Employee shall perform tasks involving quality assurance of FTS products, organizing expert and peer reviews, company development (e.g. internal procedures, websites), and product advertisement and representation, and support to product improvement or new product development. Expected travel < 20% (CV-19 pending).

Pro's:

FTS works as a small team in an attractive workspace and office location, offers flex time, and a competitive salary and benefits dependent on qualifications and motivation. The legal minimum wage for Austria for this position is EURO 49,910 p.a., however FTS is expecting 80K+ to ensure a competent skillset fulfillment.
